

# Harvester KF-601

Harvester

## TECHNICAL DATA

HEIGHT: 1950 mm

WIDTH: 1700 mm

LENGTH: 3800 mm

WEIGHT: 770 Kg

POWER REQUIRED: 60 Hp

CAPACITY: 1.5 - 4 TON

## CHARACTERISTICS OF KF-601

The machine is designed for the collection of chestnuts, hazelnuts, almonds, walnuts etc. The fruit harvested is cleaned from 70% to 90% (depending on the cleanliness of the soil). The machine offers the opportunity to use two tubes with diameter 120 mm and a length 25 m. It adapts to any type of terrain, whether flat or inclined. It is also equipped with a huller to remove the hazelnut bract.
