

Series EU 2000

Harvester for hazelnuts
and chestnuts

Series EU2000

The machine is especially suited for the picking of woody fruits as chestnuts, hazelnuts, almonds, nuts etc.. Because of its small dimension, it can be used with low and medium powered tractors to help reaching the picking spots.

Data, descriptions and illustrations are provided for information only and not binding

The machine can be used either for the picking of hazelnuts, using the anti-dust aspirator and the selection roller with 26 mm holes diameter. or for the picking of chestnuts using a selection roller with 45 mm holes diameter.

The considerable lenght of the flexible suction tube helps reaching the product to pick even in inaccessible spots.

Trolley version available on demand.
