

Swat brush with double brush

Double brush

Swat brush with double brush

The machine allows you to form windrows or rows of crops (such as hazelnuts, chestnuts, walnuts, almonds, and macadamia nuts) on the ground to facilitate harvesting by mounted or self-propelled harvesters.

It is attached to the front or rear of the tractor, and the working width is adjusted using hydraulic pistons.

Dimensions

HEIGHT: 1050 mm

WIDTH: 2700 mm
